FOR IMMEDIATE RELEASE

Frauscher Sensor Technology has successfully completed ISO 27001 certification

St. Marienkirchen near Schärding, 11.07.2023: Frauscher Sensor Technology has successfully completed the ISO 27001 certification, underlying their commitment to safety and security of their IT systems.

The ISO 27001 certification is an internationally recognised standard for information security management systems. By being certified according to this standard, the processes, guidelines and technical security measures of Frauscher Sensor Technology were subjected to a comprehensive review. Subsequently, all the respective processes were confirmed to meet the applicable requirements and to comply with the stringent audit criteria of ISO 27001.

Achieving the highest standard for IT security systems

The successful attainment of this certification serves as evidence that Frauscher has a robust and efficient information security management system in place. This system encompasses all pertinent aspects related to the confidentiality, integrity, and availability of sensitive information. Thanks to this certification, it is clear that Frauscher has adeptness in recognising potential IT security related risks, evaluating their significance, and taking appropriate measures to safeguard the security of their systems and data.

For Frauscher, this achievement not only represents a significant milestone but also signifies an official validation that they have consistently adhered to the highest standards in the realm of information security over the years. Speaking of the achievement, Walter Hofbauer, the Chief Information Officer at Frauscher said: “Our dedication to maintaining a secure environment for our stakeholders has always been the utmost priority for us and this certification serves as tangible evidence of our unwavering commitment to safeguarding information.”

The benefits of this certification have a widespread impact throughout the organisation, for instance, by enhancing customer confidence thanks to the assurance that data and information is held with the utmost care and responsibility. Furthermore, by implementing comprehensive security controls and procedures, a wide array of internal processes have been streamlined and optimised, resulting in increased efficiency, which in turn, enables a faster delivery of secure and dependable services.
