

PRESS RELEASE

FOR IMMEDIATE RELEASE

Frauscher Poland celebrates its remarkable progress over the past 25 years.

Katowice, 25 October 2023: Frauscher Poland marks its 25 years anniversary in October 2023.

Frauscher Poland commemorated a noteworthy milestone in the month of October, marking 25 years since the initial establishment of this location. Consequently, a celebratory event was held for Frauscher customers, external partners and fellow colleagues, to thank them for their dedication and ongoing support throughout the years.

The event took place in Hotel Mercure in the historic city of Wrocław. After the initial get together, the attendees had an opportunity to explore the city with a sightseeing tour which was followed by a series of insightful presentations about Frauscher Poland as well as new products and services including Frauscher Insights. The evening featured a dinner and live music in combination with an abundance of networking opportunities.

Since its inception, Frauscher Poland has made significant contributions to the Polish railway industry with its cutting-edge axle counting systems and wheel sensors which have proven to be an ideal solution for many projects around the country. Poland was the first nation where Frauscher Sensor Technology established its presence outside of Austria, and it thus plays a key role in the expansion of Frauscher as a global brand. Since entering the market, hundreds of installations of Frauscher solutions have taken place throughout the country, with some of the oldest products constructed between 1999 and 2000 still in operation today. Frauscher was therefore able to establish a renowned reputation in Poland as a leading provider of highly reliable and available axle counting solutions for the rail industry.

During the past 25 years, Frauscher Poland was involved in many prestigious projects around the country, including the installation of the Frauscher Advanced Counter FAdC® together with 300 wheel sensors at one of the nation's largest petroleum refineries. Moreover, Frauscher Poland collaborates closely with local signalling companies to assist in the implementation of the FAdC® into their own systems, which further enhances and strengthens Frauscher's presence in Poland.

Daniel Pytlik, Managing Director Frauscher Poland, sees the past twenty-five years of success as a driving force and a source of motivation for the future. As he explained further, "I am thoroughly excited to see Frauscher Poland grow – we certainly have some ambitious plans for the future and wish to build on the success of the past. Looking forward, we have a lot of exciting things planned, including the provision of various digital solutions and services which offer customers comprehensive lifecycle support, taking care of all their operational needs."

With many opportunities ahead, Frauscher Poland is well positioned to continue expanding its operations, supported by its solutions which have built a firm reputation for their reliability, availability, safety and ease of maintenance. Frauscher Poland is steadfastly committed to contributing to the modernisation of the Polish railway industry, both in the immediate future and in the years to come.
