

PRESS RELEASE

FOR IMMEDIATE RELEASE

Frauscher India has been awarded for its contribution towards Indian rail industry with its comprehensive range of innovative solutions to meet the future demands of mobility.

New Delhi, 30th January 2024: Frauscher Sensor Technology India has received an award for “Excellence In Signaling & Telecom Solutions”

Frauscher Sensor Technology India has recently received the Award for “Excellence In Signaling & Telecom Solutions” during an award ceremony which was held as a part of 5th Rail Analysis Innovation & Excellence Summit 2024, hosted on 30th January at Hotel Le Méridien Hotel in New Delhi.

The Excellence in Signaling & Telecom Solutions award has been given to Frauscher India in recognition of their comprehensive range of innovative solutions that are designed to meet the future demands of mobility, as well as the focus on bringing world class technologies and technical skills to India. Throughout the past 10 years, Frauscher India has created a solid value proposition around innovation, availability, and reliability in relation to railway technology, making significant inroads into the Indian market in a short span of a decade.

The organisation has consistently pioneered groundbreaking technological advancements within the Indian railway market, setting new standards in innovation and efficiency. Among their notable achievements is the revolutionary drill-free installation of wheel sensors, a pioneering approach that not only simplifies the mounting process but also minimises disruptions to existing infrastructure.

Another noteworthy technological milestone is the incorporation of a serial data interface with interlocking systems, fostering seamless communication and integration between different elements of the railway network. This advancement not only enhances operational efficiency but also facilitates a more cohesive and interconnected railway ecosystem.

In addition to this, Frauscher India has successfully eliminated the need for active electronics on the trackside, showcasing their commitment to streamlining railway operations and reducing maintenance requirements. This forward-thinking approach not only enhances the reliability of railway systems but also contributes to a more cost-effective solution.

These are just a small sample of the achievements that the organisation was able to introduce to the Indian railway market ever since its official establishment. To discover more about Frauscher solutions, you can contact the organisation directly at: office@in.frauscher.com.

About Frauscher

Frauscher Sensor Technology offers innovative solutions for the individual requirements of customers worldwide in the field of axle counting and wheel detection. In doing so, we strive to provide the best possible support to system integrators and railway operators throughout the life cycle of our products and beyond, giving them access to the information they need. With a worldwide network of locations and partners, we also guarantee a strong supply chain and optimum customer support around the globe.
